AKI TOY

AKITOY STORY

Akitoy is a safe DIY block toy for children.

Akitoy is an educational toy that allows children to learn and play at the same time.
It helps nurture creative thinking and develop space perception ability,and enhances the ability to think and concentrate. It is effective in the development of fine and gross motor skills as chil dren use their hands and fingers simultaneously.

Currently, large block toys are recommended for infants of an age of under 36 months because these toys are thought to be easily handled by them due to their large size. Even though Akitoy is a large block toy, its user target is children of an age over eight and it allows children to creat e forms in a more precise manner and actually use them.

A perfect harmony of function, structure and design.

With its creative [1:2:3] block assembly method, Akitoy allows users to assemble the blocks in a various forms.

Akitoy is a block toy whose pieces can be rotated 360° in any direction, right or left, upward or downward.

Akitoy can be transformed into various forms with a small volume of blocks as it is a steel structure-type prod uct unlike existing block products with a masonry brick structure.

Akitoy can be utilized for various purposes, not only as a toy for children's play but also as furniture for children or an interior decor item for adults.

Akitoy is a large block toy that allows children to assemble forms by themselves and actually use them.
